GERANIUMS

MARYLAND

(Introductory Description)

Ever since we have been in the Geranium business we have endeavored to find a novelty on which we could stake our reputation. In this endeavor we have raised hundreds of seedlings ourselves and discarded innumerable very promising seedlings offered by others, as not possessing the qualities we desired should be in our first novelty. Several years ago we placed in the hands of an expert hybridizer certain stock from which we believed the desired results could be obtained, with instructions that he was to spare neither time nor expense to produce a variety that would embrace, as far as possible, all that was required in a Geranium—color, health, fullness, habit of growth and freedom of bloom. We have no hesitation in claiming that these qualities are all found in our novelty for 1914, the Maryland.

The Maryland is the result of a cross between Alphonse Ricard and La Pilote. In habit of growth it resembles the La Pilote, only much stronger, being more robust, vigorous and branching. The foliage is handsomely marked with a chocolate zone. The individual flowers are magnificent, semi-double, perfectly formed and of grand texture, being profusely produced in enormous trusses. The color is of the most intense, dazzling, fiery red, and of marvelous beauty. Words are inadequate to accurately describe the wonderful beauty of the flower and the exquisite finish of the plant.

Maryland is a variety that we introduce to the florist and the great mass of flower lovers with every confidence that it will, with its most pleasing habit and strong constitution, prove satisfactory in every way, and meet every requirement of a first-class Geranium.

Since introducing Maryland and having it tried by innumerable, impartial growers, we find no reason to withdraw any of our claims for its merit, and now having a good stock, we place it at a popular price.
